

Md Rabiul Islam Santo

Java Full Stack Engineer

rabiul.personalinfo@gmail.com | +880 1616-913975 | Gulshan 1, Dhaka, Bangladesh | Available on 2 months notice
Portfolio: [santo-portfolio.vercel.app](#) | LinkedIn: [linkedin.com/in/md-rabiul-islam-santo](#) | GitHub: [github.com/Santosasantos](#)

Java Full Stack Engineer with 2+ years of experience building secure, scalable enterprise applications for 10,000+ users using Java, Spring Boot, Angular, TypeScript, and React. Reduced average API response time by 30%, sustained 99.8% platform uptime, and achieved 95% automated test coverage through test-driven development and clean architecture. Combines deep backend expertise (RESTful APIs, PostgreSQL, Kafka) with production frontend delivery, including Angular analytics dashboards that increased platform adoption by 52%.

■ TECHNICAL SKILLS

- Backend Development:** Java, Spring Boot, Groovy, Grails, REST APIs, Microservices Fundamentals
- Frontend Development:** Angular, TypeScript, React, Next.js, JavaScript, HTML, CSS, Vaadin, PrimeNG
- Security & Reliability:** Secure Coding Practices, JWT Authentication, Authorization, Role-Based Access Control (RBAC), Data Protection
- Databases:** PostgreSQL, MySQL, Redis
- Testing & Quality:** JUnit, Mockito, TDD (Test-Driven Development), SonarQube
- DevOps & Tools:** Git, GitLab, Maven, Gradle, Jenkins, Docker, Kubernetes (familiar), JIRA
- Cloud & Messaging:** AWS (foundational), Apache Kafka, RabbitMQ
- Methodologies:** Agile/Scrum, Clean Architecture, SOLID Principles

■ PROJECTS

NexusPay — Full Stack Fintech Payment Platform

- Java, Spring Boot, PostgreSQL, Redis, Apache Kafka, Resilience4j, React, Next.js, TypeScript, Docker — [github.com/Santosasantos/NexusPay](#)
- Engineered a secure full-stack fintech platform supporting digital wallets and concurrent peer-to-peer transactions with 100% ACID-compliant operations.
 - Eliminated 100% of transfer deadlocks through pessimistic database locking and API idempotency; decoupled notification and analytics services with Kafka events.
 - Built a real-time analytics dashboard with React, Next.js, and TypeScript over a JWT-secured REST API spanning 2 role-separated portals (consumer and admin); protected critical endpoints with Resilience4j rate limiting.

360-Assessment — Employee Performance Management Platform

- Spring Boot, Angular, TypeScript, JHipster, PrimeNG, PostgreSQL — [github.com/Santosasantos/epms](#)
- Developed a full-stack 360-degree evaluation platform processing multi-source feedback for 500+ employees.
 - Designed secure backend modules for analytics aggregation, reporting pipelines, and role-based access control across 5 responder categories (self, supervisor, peer, supervisee, stakeholder).
 - Improved reporting efficiency by 40% through interactive Angular dashboards and optimized data retrieval.

Massier — Mess Management System

- PHP, JavaScript, MySQL, AJAX — [github.com/Santosasantos/Massier](#)
- Created a web platform automating hostel and mess operations for 200+ residents, improving operational efficiency by 70%.
 - Implemented real-time updates and an AJAX chat module, reducing communication overhead by 85%.

■ EXPERIENCE

Software Engineer 04/2024 - Present

BRAC IT Services Ltd, Software Engineering Department — Dhaka, Bangladesh

- Engineered scalable backend services using Java, Spring Boot, Groovy, and Grails for enterprise-grade applications serving 10,000+ users.
- Built full-stack features with Spring Boot, Angular, and Vaadin — including the 360-Degree Feedback module (EPMS), improving evaluation workflow speed by 40%.
- Optimized RESTful APIs and database queries, reducing average response time by 30% across high-usage modules.
- Designed interactive analytics dashboards with Angular and ApexCharts, increasing platform adoption by 52%.
- Strengthened application security by implementing authentication, authorization, and role-based access control, protecting sensitive data workflows for 10,000+ users.
- Applied clean architecture, SOLID principles, and Test-Driven Development, achieving 95% automated test coverage.
- Streamlined CI/CD workflows using Git, GitLab, Maven, and Jenkins, sustaining 99.8% platform uptime.

■ EDUCATION

B.Sc. in Software Engineering (CGPA: 3.45 / 4.00) 01/2020 - 08/2025

Noakhali Science and Technology University — Noakhali, Bangladesh

■ ACHIEVEMENTS & AWARDS

Champion — BUET CSE Fest CTF

BUET — 10/2024

9th Place — CTFBD Maze in Antarjal

ICT Division — 06/2023

Best Campus Leader — Banglalink AppLink

Banglalink — 11/2022

■ INTERESTS
