

Md Rabiul Islam Santo

Java Backend Engineer

 rabiul.personalinfo@gmail.com  +880 1616-913975  Gulshan 1, Dhaka, Bangladesh

 Availability upon 1 month notice  Portfolio  LinkedIn  GitHub  LeetCode

Java Backend Engineer with 2+ years of hands-on experience designing and developing secure, scalable enterprise applications using Java, Spring Boot, Groovy, and PostgreSQL. Skilled in building RESTful APIs, optimizing backend performance, implementing test-driven development, and collaborating in Agile environments. Experienced in enterprise-grade systems with strong focus on clean architecture, secure coding practices, and high-availability backend solutions.

TECHNICAL SKILLS

Backend Development: Java, Spring Boot, Groovy, Grails, REST APIs, Microservices Fundamentals

Security & Reliability: Secure Coding Practices, JWT Authentication, Authorization, Data Protection

Database: PostgreSQL, MySQL

Testing: JUnit, Mockito, TDD (Test Driven Development)

DevOps & Tools: Git, GitLab, Maven, Gradle, JIRA, Jenkins (basic)

Cloud & Messaging: AWS (foundational), Docker (Basic), Kubernetes (familiar), Kafka/RabbitMQ

Frontend (Supporting): Angular, TypeScript

Methodologies: Agile, Clean Architecture, SOLID Principles

PROJECTS

NexusPay 

Java, Spring Boot, PostgreSQL, Kafka, Resilience4j, JWT - Fintech Payment Platform

- Engineered a secure fintech platform supporting digital wallets and concurrent peer-to-peer transactions.
- Eliminated transfer deadlocks through advanced database locking and API idempotency, ensuring ACID-compliant operations.
- Scaled asynchronous workflows using Kafka and strengthened fault tolerance with Resilience4j rate-limiting strategies.

360-Assessment 

Spring Boot, Angular, JHipster, PostgreSQL - Employee Feedback Platform

- Developed a scalable evaluation platform supporting multi-source feedback across enterprise teams.
- Designed secure backend modules for analytics aggregation, reporting pipelines, and role-based access control.
- Improved reporting efficiency by 40% through interactive dashboards and optimized data retrieval mechanisms.

Massier

PHP, JavaScript, MySQL - Mess Management System

- Created a digital management tool for hostel/mess operations including meals and expense tracking.
- Implemented real-time updates and chat system using AJAX and PHP.

EXPERIENCE

Software Engineer

BRAC IT Services Ltd, Software Engineering Department 

04/2024 – Present | Dhaka, Bangladesh

- Engineered scalable backend services using Java, Spring Boot, Groovy, and Grails for enterprise-grade business applications.
- Optimized RESTful APIs and database queries, reducing average response time by 30% across high-usage modules.
- Strengthened application security by implementing authentication, authorization, and role-based access control for sensitive data workflows.
- Applied clean architecture, SOLID principles, and Test-Driven Development practices, achieving 95% automated test coverage.
- Resolved production-level performance bottlenecks and improved system reliability in Agile delivery environments.
- Streamlined CI/CD workflows using Git, GitLab, Maven, and Jenkins to enhance deployment efficiency.

EDUCATION

B.Sc. in Software Engineering (CGPA: 3.45 / 4.00)

Noakhali Science and Technology University

01/2020 – 08/2025 | Noakhali, Bangladesh

ACHIEVEMENTS & AWARDS

Champion – BUET CSE Fest CTF

BUET

31/10/2024

9th Place – CTFBD Maze in Antarjal

Inspired by ICT division

16/06/2023

Best Campus Leader – Banglalink Applink

Banglalink

30/11/2022
